The uſe of the Five former Tables.

For the firſt if you would know to how much one pound ſtock amounts at Intereſt upon Intereſt in any number of yeers not exceeding 31. Seek the number of yeers in the firſt Colume towards your left hand, under this word yeers, and there directly againſt the ſame you ſhall ſee the ſum deſired.

Example.

To know how much intereſt upon 1 l. ſtock amounts at intereſt upon intereſt in 21. yeers, look 21 under the word yeers, and directly againſt the ſame you ſhall ſee 5 l. 0 s. 8 d. which is the ſum deſired: Again to know how much 1 ol. ſtock in the ſame time, multiply the ſame by 10, or adde the ſame 10 together, which makes 50 l. 6 s. 8 d. which is alſo the ſumme deſired: And thus may you work upon any ſum deſired in any of the other 4 columes obſerving the manner as is before, as the propoſitions nominated in the head of each colume doe direct.

A Table shewing how many yeers purchase a Lease to endure for any number of yeers under 31. is worth presently at intereſt upon intereſt; and without caſualty.

The uſe and explanation of this Table.

It is calculated for 30 yeares: the firſt columne whereof towards the left hand ſheweth the yeares of a Leaſe; and right againſt each yeare on the right hand is the number of the yeares; quarters; and half quarters of yeares purchaſe that ſuch a leaſe is worth.

Example:

Suppoſe there be a Leaſe to be ſold to endure for 15 yeares to come: and you would know how many yeares purchaſe it is worth.

Look in the table under the titles of yeares of a Leaſe for 15 and right againſt it on the right hand you ſhall finde 7 yeares 3 quarters and a half quarter of a yeares purchaſe; the value of ſuch a Leaſe within an eighth part of a yeares rent; which is the neereſt value that I have calculated this table unto, in regard of the omiſſion of many fractions that would ariſe.
